

10 Reasons for

SAP Certified
Integration with RISE with SAP S/4HANA Cloud

1. All Five Pillars of SAP Licensing in a Single Solution

Named User

Engines

Indirect/Digital Access

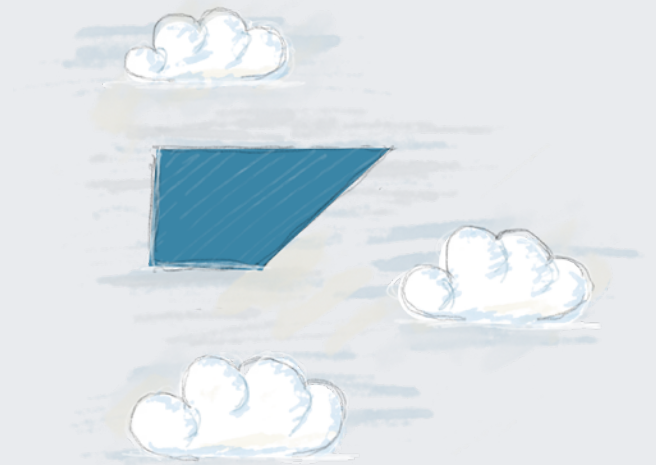

Infrastructure

SaaS Solutions from SAP

No other tool fully integrates these areas into a single platform.

2. SAP-FINOPS Plattform

DLC provides a complete overview of the entire SAP environment – from traditional ERP systems to SaaS services.

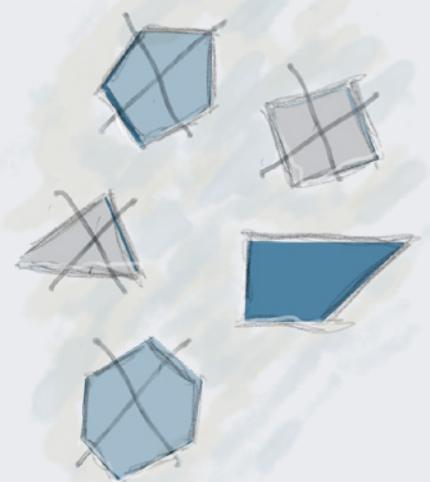

3. RISE and FUE Simulation without changing roles

DLC can simulate future licensing models without changing production roles or permissions.

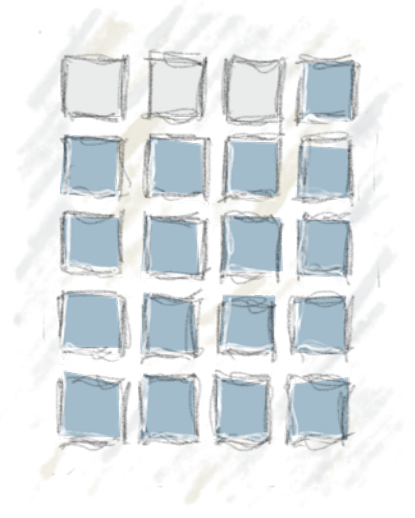

4. Integrated Role Analyzer

- STAR-Delta Analysis
- Analysis of unused permission objects
- Detection of unused roles
- Classification of customer-specific AUTH objects

5. Unique Price Assignment for Roles

DLC is one of the few tools that can **directly link roles to license costs.**

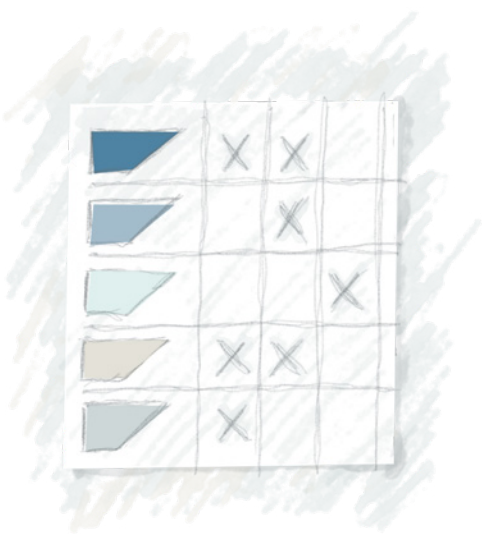

6. Automatic Classification of Authorization Objects

Up to **85% of previously unclassified objects** can be **automatically evaluated**.

7. Cost Allocation and Forecasting

Costs can be allocated by

- cost centers
- countries
- departments
- business units.

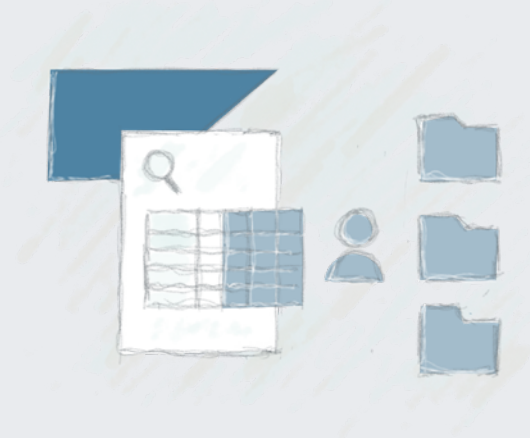

8. Complete Contract Management

DLC creates a complete **SAP license bill of materials (BOM)** and provides a precise overview of contracts.

9. Extensible Data Analysis

Customers can easily integrate their own tables, fields, or data sources into the analysis.

10. Open Architecture with REST API

The REST API enables integration into existing

- SAM tools
- BI platforms
- Governance systems.

Comprehensiveness

“The only solution that covers all five pillars of SAP licensing.”

Automation

“Up to 80% less manual effort in license management.”

Decision-making foundation for S/4HANA & RISE

“Well-founded simulations and transparency for transformation and contract negotiations.”
